

Emergency and Evacuation Policy

BACKGROUND

A Service must have policies and procedures which set out what must be done in an emergency and to have an emergency and evacuation floor plan that is displayed in a prominent position. Emergencies can include:

- Cyclone,
- Flood,
- fire or bushfire,
- the presence of dangerous animals or insects,
- other situations that require a lockdown to be implemented, or
- a situation that requires the evacuation of the premises.

However, an emergency may also include an accident or sudden illness that requires the immediate response of educators. It might include an asthma attack, a seizure or an anaphylactic reaction. The Nominated Supervisor (Principal) must ensure that services are included with all other aspects of the site emergency procedures. There must be close links and liaison between the Nominated Supervisor (Principal) and service educators to ensure consistency.

POLICY STATEMENT

Holy Family Catholic School OSHC service considers the safety of our families, children and educators is paramount. Pivotal to our overall safety procedures is the management of emergency situations. Our procedures are tested and reviewed a minimum of once each school term and explained to all stakeholders.

HOW THE POLICY WILL BE IMPLEMENTED

Risk assessments have been undertaken to identify the potential emergencies that are relevant to the service. From this assessment, emergency procedures have been developed.

1. Evacuation

Fire extinguishers are installed and maintained in accordance with Australian Standards. Educators will be instructed in their operation. Educators will attempt to extinguish fires only when:

- a fire is burning in the exit and is preventing the safe evacuation of the children and staff,
- the children have been evacuated from the room,
- the fire is small,
- there is no danger to the person operating the extinguisher and the person is well trained and confident in its use.

A fire blanket has been installed and appropriate functioning smoke detectors are installed and there is a residual current device fitted.

Floor plans are clearly displayed near the main entrance and exit of each room used by the OSHC service and are to be followed in the event of fire, natural disaster or other emergency. An emergency pack stored in the office with the first aid kit included.
